

SHALLOW PROFILES FOR SOFFIT APPLICATIONS
16/500 and 25/125/1000

On 1st August 2016 the 20/1066 profile was discontinued. Whilst this profile was a niche one, it was valued for many applications, particularly soffits. As such, a new 16/500 pressed profile is now available, along with a 25/125/1000 rollformed profile.

16/500
