The full range of RAL colours are available in painted aluminium material with a PVDF coating.

Project specific details of the expected performance of the coating are available through the Euroclad Technical Department.

As a result of the printing process, the colours depicted here may deviate from the actual colours.

You must verify your selected colour using a coloured material sample before order confirming your material order. For more information please contact the Euroclad Sales Office on: **029 2079 0722**.

Please note that there is a minimum order quantity of 300m² for all painted aluminium material.

Material warranty and COSH information is available on our web site: www.euroclad.com
